

### Global UI Media Player Mode

#### Stopped State:

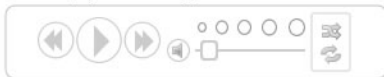

Default state when entering the application. The media player is shown with the all.com logo. Auxiliary functions (repeat and shuffle).

- Interactivity would be the same for any of the modes. Visual style and design would be the same for all 3 modes.

#### Mouseover State:

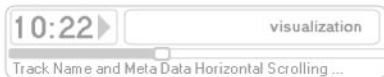

When the user mouse over the media player VTR controls are shown. Auxiliary functions (repeat and shuffle) are shown.

- Centered transparent element controls hide again after the focus of the mouse is outside the border of the UI element.

#### Play State:

Pressing play shows the track time, state, meter, meta information. If a user mouse over the media player the VTR controls are shown.

- Click for different time modes. Play state is to the right of the time.

- Click for different visualizations.
- Click and drag to see entire track info as it scrolls.

### Preview UI Media Player Mode

**Mouseover State:** When the user mouseover's the preview window the basic VTR controls are shown. Identical functionality to the media player.
